To Whom It May Concern,

I am delighted to recommend Mohamed Haddaoui for any endeavor he pursues. During his internship at Thinkable, Mohamed demonstrated outstanding skills and dedication.

Mohamed's primary project involved frontend and backend development responsibilities utilizing angular, nest js , and graphql for an AI powered script writing software called PlotDot. He helped develop the application and enhanced its core components, significantly improving its performance, appearance, and usability.

I have no doubt he will excel in any role he undertakes.

Sincerely,

A handwritten signature in black ink, appearing to be "MS" followed by a stylized flourish.

Matt Sanders

President
