Profile

I am a passionate Junior Software Engineer with a strong foundation in software development, a keen interest in new technologies, and a rigorous approach to problem-solving. I excel in team environments and am eager to contribute to innovative projects, always pushing my boundaries to achieve excellence.

Education

Software Engineer Student — Mohammed VI Polytechnic University - 1337 📅 2021 - present

First Year Of Bachelor's In Physical Sciences — Moulay Ismail University 📅 2018 - 2019

Baccalaureate Of Physical Sciences — Salam High School 📅 2017 - 2018

Experience

Thinkable — Software Engineer

📅 Nov 2023 - Apr 2024

Project AI-Powered Script Writing Software (PlotDot)

Angular Nest.js MongoDB GraphQL

- Developed and enhanced core components of PlotDot.
- Improved the application's performance, appearance, and usability.
- Improved the application's performance, appearance, and usability.
- Contributed to significant user interface improvements.
- Received a commendation for outstanding skills and dedication from Matt Sanders, President of Thinkable, upon completion of the internship.

Skills & Tools

Languages

Projects

HyperTube

<https://github.com/mhaddaou/hypertube>

Next.js Tailwind CSS Typescript

This project involves designing and developing the frontend of a movie streaming web platform. It focuses on creating a user-friendly interface, with dynamic animations and responsive layouts, while collaborating with a backend developer working on the server-side with Rust.

FT_Transcendence

https://github.com/mhaddaou/ft_transcendence

Nest.js Next.js Socket.io Tailwind CSS Typescript PostgreSQL

This project consists of creating a website for the mighty Pong contest including the user accounts, chatting in channels and playing the game pong features.

INCEPTION

<https://github.com/mhaddaou/inception-42>

Docker

This project aims to broaden our knowledge of system administration by utilizing Docker. I virtualize several Docker images, creating them on our new personal virtual machine.

FT_IRC

https://github.com/mhaddaou/ft_ircc

C++

Contributed to the development of an IRC server project, implementing server functionality, handling user connections, and ensuring seamless communication within the IRC network using C++.
